

ECS Compost Mixers

engineered**COMPOST**systems

ECS recommends and provides the extremely durable Luck/Now horizontal and vertical mixers compost mixers manufactured by the Helm Welding Company. ECS is the exclusive representative for Luck/Now mixers for composting applications in North America.

ECS engineers have specified Helm Welding mixers for compost systems since 1995 and incorporate them into compost facilities for all types of feedstocks including MSW, food waste, biosolids, manure and industrial wastes.

ECS engineers work with Helm Welding to integrate Luck/Now Mixers with other facility components such as in-feed and discharge conveyors, hydraulically operated features and customized fabrication for unique mixer mounting applications.

Luck/Now Mixers offer a variety of options to suit any process or diverse facility conditions such as: stationary or mobile models; two wheeled trailer (PTO Model) or four wheel cart, electric or IC powered, and, with capacities ranging from 200 to 900 cubic feet.
